Dina Blachman

New York, NY 10027 | 732-570-6182 | db3654@barnard.edu | dinablachman.com

Education

Barnard College, Columbia University Expected May 2027
BA Computer Science and Philosophy *GPA: 3.96*

- Dean's List (Fall 2023–Spring 2026) | Coursework: Data Structures in Java, Advanced Programming in C, Databases, Computer Science Theory, Machine Learning, Natural Language Processing, Artificial Intelligence

Engineering Experience

AI/ML Intern June 2026 – August 2026
J.P.MorganChase *New York, NY*

- Built an internal AI knowledge platform serving 5 lines of business, providing enterprise context for AI agents.
- Owned full-stack development and production launch of a VS Code AI extension with custom agentic workflows.
- Standardized production telemetry and structured JSON logging across 3 AI services, enabling cross-service tracing with request IDs and Splunk/Grafana dashboards while establishing the standard for new AI services.

Software Engineering Intern February 2026 – April 2026
Phoebe Health *New York, NY*

- Built React autocomplete for caregiver/client/shift records, inserting database context as @-mention pills in chat.
- Fixed lost caregiver selections across pages so schedulers could build outreach lists from 2,000+ caregivers.

API Intern May 2024 – August 2024
Carson Living *New York, NY*

- Built and tested a priority-flag REST endpoint for urgent maintenance reports across 500+ buildings.
- Owned on-call production fixes and optimized multi-table SQL queries to resolve client issues under tight SLAs.

Research Experience

Undergraduate Researcher May 2025 – Present
Barnard Summer Research Institute *New York, NY*

- Built an NLP pipeline to flag prosecutorial misconduct in court rulings, cutting review from months to days.
- Fine-tuned an open-source LLM with LoRA/PEFT and 4-bit quantization, reaching ∼79% classification accuracy.
- Piloting with investigative journalists in a newsroom study; co-authoring a paper on human-AI collaboration.

Projects

Campus Bug Bounty | *FastAPI, React, TypeScript, GitHub API* 2nd Place, Cursor Kickoff Hackathon

- Centralizes campus-wide platform bugs and feature requests into one board for students to fix via CI-gated PRs.

Leetgate | *Swift, SwiftUI, Chrome MV3 Extension*

- MacOS notch app that locks distracting apps and sites until a daily quota of NeetCode problems is solved.

xTinct | *React, Node/Express, Cheerio*

- Restores a snapshot of a deleted X account using public Wayback archives with caching and bounded concurrency.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, Swift, HTML/CSS
Frameworks & Databases: React, FastAPI, Django REST Framework, Node.js/Express, PostgreSQL
AI/ML: PyTorch, Hugging Face Transformers, LoRA/PEFT, OpenAI API, VS Code Language Model API
Tools & Infrastructure: Git, Docker, AWS, CI/CD, GitHub Actions, Spinnaker, Splunk, Grafana

Leadership & Campus Involvement

Community Lead October 2023 – Present
Application Development Initiative, Columbia University *New York, NY*

- Lead 6+ events per semester for Columbia's largest tech club, connecting 150+ students with industry leaders.

Campus Lead September 2025 – Present
SpaceXAI, Columbia University *New York, NY*

- Lead AI workshops, beta-test Cursor and Grok Bot features, and translate student usage into product feedback.
